Consistent with its commitment to support the health and well-being of surrounding communities, San Carlos Bioenergy, Inc. held its annual outreach in Barangays One, Punao and Palampas on March 27, 28 & 29, 2019 respectively, which for the first time included dental services in partnership with the City Health Office (CHO) Dental Bus Team headed by Dr. Alejandra N. Lebrilla. This annual activity was implemented in coordination with the CHO under the leadership of Dr. Arniel Portuguez with the support of barangay officials and barangay health workers. A total of 517 (458 consultations and 59 dental check-ups) residents in three barangays received free medical consultation, dental services (including tooth extraction) and complimentary medicines for common illnesses as well as vitamin supplements for adults and children.
